

Working together to reduce the incidence and impact of cancer for all North Dakotans.

The number of people newly diagnosed with cancer continues to rise. This means that more people are living with cancer and coping with the effects of treatment while resuming their day-to-day routines. The impact of cancer in North Dakota can be reduced by implementing effective interventions to decrease the incidence of preventable cancers, detecting cancers early, and ensuring access to quality cancer care services from diagnosis through survivorship or end of life.

12:15 pm Registration/Check-in
Pioneer Room, ND State Capitol

Tuesday, June 25, 2024 Agenda
